Give govt a chance to solve 1MDB issue: PM

The Sun - 19/10/2015
SHAH ALAM: The people should give the government a chance to solve the 1Malaysia Development Berhad (1MDB) issue and not prejudge it.

Prime Minister Datuk Seri Najib Abdul Razak said if the people have faith in the government then no issue is too big to be solved.

“With your support, we will overcome all economic and political challenges. Even

1MDB can be resolved.

“We have announced the rationalisation programme for 1MDB, give it a chance to succeed, allow it to be resolved.

“If there are any wrongdoings then let the Public Accounts Committee (PAC) find out and take action accordingly,” Najib said.

He also told the Opposition to not politicise the issue in an attempt to overthrow the government, as BN has been

democratically elected to serve the people for five years in the 13th general election.

Meanwhile, Gerakan president Datuk Mah Siew Keong once again called for a speedy and thorough investigation of 1MDB by government agencies and the PAC.

Mah said it is in the national interest for this matter to be resolved quickly as the public has been skeptical about this 1MDB issue.
