PUTRAJAYA: Former pm me minister Tun Dr Mahathir Mohamad finds the MH370 interim statement unacceptable and fears that "technology games" are behind the disappearance.

"I find it strange that an aircraft weighing up to 230 tonnes can vanish. In this age of communication, we can see the face of our friend 12,000 miles away. This is a real mystery, a first in world history. I fear that technology games are at play," he said after "The New World Order: A Recipe For War or Peace" International Conference at Putrajaya International Convention Centre, here yesterday. The statement by the Malaysian International Civil Aviation Organisation probe team was released yesterday.

He also described the allegation that the pilot plunged the aircraft into the Indian Ocean as illogical. - Bernama
