## Hydrogen-fuelled car impresses premier

**PUTRAJAYA:** Prime Minister Datuk Seri Anwar Ibrahim, who had the opportunity to ride a hydrogen fuel cell vehicle with Science, Technology and Innovation Minister Chang Lih Kang here yesterday, was clearly fascinated with the vehicle.

Chang said during the short journey from the Science, Technology and Innovation Ministry to Perdana Putra, Anwar took the opportunity to check out the Toyota Mirai.

“The prime minister is very interested. His first impression – he

said the engine is very quiet. This means that he feels it is quieter when riding in this car compared with a petrol vehicle,” said Chang at a media conference after attending a demonstration of the mobile hydrogen refuelling unit and the hydrogen-powered car.

Chang said Anwar did not share many things because the journey only took about five minutes, but he was visibly impressed and was indeed interested in the vehicle.
