NEW STRAITS TIMES 13 JUL 2025

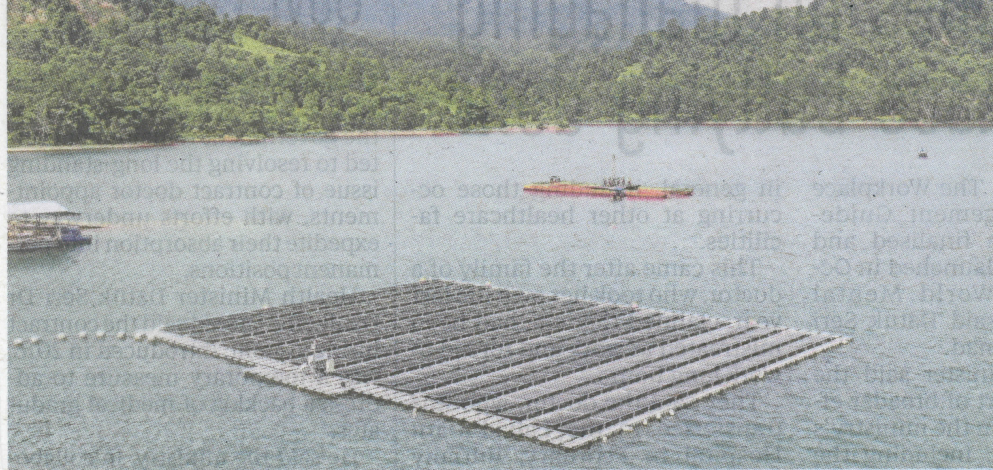

**KUALA BERANG:** The newly launched Hybrid Hydro Floating Solar (HHFS) and Green Hydrogen Hub projects in Terengganu have the potential to attract international investors, said Prime Minister Datuk Seri Anwar Ibrahim.

He said the alternative energy initiative, a collaboration between Petroliam Nasional Bhd (Petronas) and Tenaga Nasional Bhd (TNB), aligned with Malaysia's energy policy and in-

ternational aspirations for green energy.

"Kenyir is becoming a focal point of interest for international investors. This is not just a boost for Terengganu, but also Kenyir itself will become a major attraction.

"The project has been implemented efficiently and swiftly," he said at the launch for the ventures at the Sultan Mahmud Power Station in Kenyir yesterday.

The projects aim to position Malaysia as a regional leader in the green hydrogen value chain, while supporting the National Energy Transition Roadmap and the Hydrogen Economy and

Technology Roadmap.

The Green Hydrogen Hub is a strategic collaboration between Petronas and TNB, while the HHFS project is a joint venture between TNB's power generation

subsidiary, TNB Genco Sdn Bhd and Terengganu Inc.

The HHFS pilot project has a capacity of 100 kilowatts and spans 1,085sq m with 220 solar panels. **Bernama**
