KUALA LUMPUR, Jan 31 — The Perdana Global Peace Foundation today accused Datuk Seri Anwar Ibrahim of supporting directly Israel's racial killings against Palestinians.

The global movement founded by former Prime Minister Tun Dr Mahathir Mohamad was responding to the opposition leader's reported remarks on the Middle East state in the Wall Street Journal last week.

"To the PGPF, anyone who wants to 'support all efforts to protect the security of Israel' is abetting, if not outrightly supporting, Israel's continued genocide of Palestinians and undermining all the efforts of Malaysians to support the Palestinians struggle for sovereignty," it said in a statement.

Anwar, who has been under heavy fire from various groups including Umno and its media following the report, has clarified he agreed to a two-state solution for the troubled Middle East region that Malaysia's foreign affairs had raised in the UN General Assembly in September last year.

Muslim-majority Malaysia is a staunch supporter of Palestine and has no diplomatic ties with Israel.
