

Perlis Raja Muda Wants Expansion Of Student Streaming Into Science And Technology
Bernama
September 24, 2012

KANGAR, Sept 24 (Bernama) -- The Raja Muda of Perlis, Tuanku Syed Faizuddin Putra Jamalullail, has called for expansion of the programme to group students into the science and technology streams to encompass the primary school to help balance the technology shift in developed nations.

Speaking at the centennial celebration of Sekolah Kebangsaan Utan Aji, near here, today, he said he hoped that the expansion would help boost the number of quality scientists and technologists in the country.

He expressed confidence that if the number was high, innovation in science and technology would expand to help generate greater national income.

The ruler also suggested that the government encourage inventions, streamline the teaching of science and technology and open avenues for innovators to go international.
