

**Enough water in 7 Selangor dams – Bernama**  
**The Malaysian Insider**  
**March 5, 2015**

The water level in seven Selangor dams is above critical level and adequate to meet the needs of users in the state.

Selangor Menteri Besar Mohamed Azmin Ali said the water supply in the state is under control.

"Tasik Subang Dam recorded the highest water level at 97.51% followed by Semenyih Dam at 94.7%," he said in a statement today.

Azmin said the five other dams are Sungai Langat (94.64%), Batu (89.07%), Klang Gates (86.79%), Sungai Selangor (75.05%) and Sungai Tinggi (69.62%).

"This level is higher than over the corresponding period last year. For example, on March 4, 2014, Sungai Selangor dam was at 44.84% compared to today's reading of 75.05%.

"We also found that water consumption per capita for users in Selangor is at a high of 235 litres daily. Users should reduce water usage to ensure continuous supply." – Bernama, March 5, 2015.
