The Royal Malaysian Air Force (RMAF) and Indonesian Air Force will team-up to investigate the cause of the mishap involving two aircraft from the Jupiter Aerobatic team, in Langkawi today.

According to the organiser of the Langkawi International Maritime and Aerospace 2015 (Lima 2015) exhibition, the two aircraft had clipped each other's wings during display rehearsals.

It said two of the six KT-1B Wong Bee aircraft, both belonging to the Indonesian air force, were involved in the mishap, resulting in the loss of both aircraft.

"All four pilots ejected from the aircraft successfully and are now under observation at the Langkawi Hospital," it said in a statement today.

It also said that the search and rescue (SAR) team headed by the RMAF was on hand within minutes of the incident and successfully located the pilots in Kendawang, approximately 11.3km away from the Mahsuri International Exhibition Centre.

However, it said a house and car parked nearby caught fire as result of the falling debris. The owner of the house and car was not at home at the time of the accident.
