

Dr Mahathir Still Receiving Treatment at IJN
Bernama
Aug 10, 2016

KUALA LUMPUR, Aug 10 (Bernama) -- Former Prime Minister Tun Dr Mahathir Mohamad is still receiving treatment at the National Heart Institute (IJN) after being admitted for a chest infection last night.

Dr Mahathir has been placed under medical observation for a few days until his health returns to normal, said an IJN spokesman.

The IJN Corporate Communications Department said in a statement yesterday that Dr Mahathir, 91, was placed in the general ward and visitors were restricted to family members only on the advice of the medical team.

In 1989, he suffered heart problems and had undergone coronary bypass surgery at the IJN.

He underwent a heart bypass surgery a second time in 2007.

In 2013, Dr Mahathir was admitted for 10 days for treatment of chest infection.
