The Singapore Internet Research Centre (SiRC) initiates and conducts research related to new media/internet across Asia, including East, Southeast, and South Asia. The centre's mission is to bring Asian experiences and perspectives to the global discussion about the innovation, development and impact of the internet and information technologies.

Canada's International Development Research Centre (IDRC) is one of the world's leading institutions in the generation and application of new knowledge to meet the challenges of international development. Since 1970, IDRC has worked in close collaboration with researchers from the developing world as they strive to build healthier, more equitable, and more prosperous societies

The Institute of Southeast Asian Studies (ISEAS) was established as an autonomous organization in 1968. It is a regional centre dedicated to the study of socio-political, security and economic trends and developments in Southeast Asia and its wider geostrategic and economic environment. The Institute's research programmes are the Regional Economic Studies (RES, including ASEAN and APEC), Regional Strategic and Political Studies (RSPS), and Regional Social and Cultural Studies (RSCS).

ISEAS Publishing, an established academic press, has issued more than 2,000 books and journals. It is the largest scholarly publisher of research about Southeast Asia from within the region. ISEAS Publishing works with many other academic and trade publishers and distributors to disseminate important research and analyses from and about Southeast Asia to the rest of the world.
