

MEDIA STATEMENT FOR IMMEDIATE RELEASE

Institut Jantung Negara, 27 September...YABhg Tun Dr Mahathir bin Mohamad continues to make significant progress four-days after his second surgical procedure on Saturday for wound debridement.

He is now breathing on his own since 2pm yesterday and doctors are now focusing on post surgical rehabilitation.

These include physiotherapy to his chest to optimise his respiratory function as well as exercises to his arms and legs to build muscle strength.

Tun Dr Mahathir continues to be warded at the Intensive Care Unit.
