# Foreword

'Keringkam Sarawak' is an extraordinary intricate handicraft of Sarawak Malays that combines beautiful patterns into informative culture presentation. This publication hopes to draw attention of everyone, from school children to researchers, likewise, to an almost forgotten, yet, precious handicraft.

Culture grows on the shoulders of the community. Its development and sustainability is not a placid travel but an awesome awakening that endures millenniums.

Pustaka will continue to collaborate with our partners in the documentation of local and indigenous knowledge as one of the ways to preserve our culture and heritage for future generations.
