# ACKNOWLEDGMENTS

The present work is an edited version of my dissertation, which was submitted to Temple University in partial fulfillment of the requirements for Ph.D. under the title “Taxes and Motivation for Foreign Direct Investment in South East Asian Countries”.

I would like to thank the member of my committee, Professors Daniel Ryan and Vladimir Bandera, for the careful attention they gave the dissertation. I wish to express special gratitude to my advisor, Professor Fyodor Kushnirsky. He provided generously of his time in helping me developing an estimating model, offered innumerable and valuable suggestions which made the dissertation more mature, gave extraordinary care and attention in editing the dissertation, and showed great concern in the progress of my work. To him I owe the greatest intellectual debt that cannot be repaid.

I am grateful to the International Islamic University of Malaysia for granting me a four-year study leave with generous financial support and to the Research Centre of International Islamic University Malaysia for funding this research.

I am also thankful to my mother who constantly encouraged me in this work. Finally, and most of all, I am grateful to my husband, Shahrhan Kassim, for helping me with data collections, obtaining reference materials and for providing numerous other helps. He has shown great patience and understanding during the course of my work. It was his unconditional love, emotional, as well as moral support, which has enabled me to complete this work. To him I am eternally grateful.
